

Will she remember how good her hair looked or **how wet her back was?**

Our protective, NeatNek neck cape prevents water and chemicals from running down your client's neck and back.

While at the shampoo bowl, NeatNek capes will...

- Keep your client's neck & back dry
- Prevent damage to the client's clothing
- Prevent excess laundry — save detergent & water
- Prevent dangerous, wet, slippery floors

Ideal for:

- Shampoos
- Perms
- Color
- Haircuts
- Hair Restructuring

Instructions:

1. Put your regular cape and towel on the client as usual.
2. To remove one NeatNek from the pad, hold the cape by the bottom-center and pull it straight down to separate it at the perforation.
3. Place the curved portion of the NeatNek cape against the back of your client's neck — ABOVE the towel.
4. Using the finger holes, have your client hold the cape snug against the back of their neck.
5. Drape the NeatNek cape into the shampoo bowl.
6. After rinsing, blot the client's hair and neck before having them let go of the NeatNek cape.
